Safety, Operation, Maintenance & Parts Manual

SSW, SSW-R, SSW-150 rev. A.00 - A.05

Safety is our #1 concern!

February 2010

Form #1611

WARNING! Read and understand this manual before using this machine.

California

Proposition 65 Warning

WARNING: Breathing gas/diesel engine exhaust exposes you to chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

Always start and operate the engine in a well-ventilated area.
If in an enclosed area, vent the exhaust to the outside.
Do not modify or tamper with the exhaust system.
Do not idle the engine except as necessary.

For more information go to www.P65warnings.ca.gov.

WARNING: Drilling, sawing, sanding or machining wood products can expose you to wood dust, a substance known to the State of California to cause cancer. Avoid inhaling wood dust or use a dust mask or other safeguards for personal protection.

For more information go to www.P65Warnings.ca.gov/wood.

3.2 Wiring Diagram (LX150/LX250 installed) 3-2

SECTION 1 SETUP & OPERATION

1.1 Initial Setup

Simple Set will start up in manual mode when you turn the sawmill control key switch to the ON (#1) position. As the control powers up, the software revision is briefly displayed.

In manual mode, press the Up arrow to enter the setup menus.

MENUS

Set Speed: Available values are 1 - 5. The default value is 5. Lowering the Set Speed will assist in achieving the desired blade height setting in situations where the up/down chains or mast pads are too loose.

Up and Down buttons: Scroll to the desired Set Speed setting.

Auto button: Scrolls to the Units menu

Manual button: Exits setup.

Units: Simple Set can display units in inches (default) or millimeters.

Up and Down buttons: Scroll to the desired Units setting.

Auto button: Scrolls to the Language menu

Manual button: Exits setup.

Language: To date, the only available language is English.

Auto button: Scrolls back to the Set Speed menu

Manual button: Exits setup.

1.2 Operation

Manual: With Simple Set in manual mode, operate the sawmill up/down system as normal with the sawmill control drum switch. The display will show a 'D' when the drum switch is pushed down and a 'U' when pushed up.

Auto: With Simple Set in auto mode, the saw head will move down the increment displayed when the sawmill control drum switch is activated in the down position. The saw head will move up as normal when the drum switch is activated in the up position. Two sets of values can be stored in the control.

Two sets of values can be stored in the control.

1. Push the Auto button to toggle between Set1 and Set2.
2. Use the Up and Down buttons to adjust the value in 1/16" (or 1mm) increments in Set1 or Set2.
3. Bump the up/down switch down to move the blade to the next increment. Holding the switch up or down will bypass Simple Set and move the saw head until the up/down switch is released.
4. If the saw head is raised before the next cut, bumping the up/down switch down will return the saw head to the original position plus the increment value.
5. Push the Manual button to exit auto mode.
6. Turn the sawmill control key switch to the OFF (#0) position to power off Simple Set.

FIG. 1-1

1.3 Troubleshooting

Error Messages

Simple Set error messages.

Error	Description
E02 Sensor	This message is displayed if Simple Set cannot detect the encoder sensor magnet when entering auto mode. Check that the gear box extension is aligned with the sensor. Push any button on the Simple Set control to exit to manual mode.
E03 Sensor	This message is displayed if Simple Set cannot detect a signal from the encoder sensor when entering auto mode. Check the encoder sensor cable connections. push any button on the Simple Set control to exit to manual mode.

Diagnostic Lights (After Mid-2016)

LED indicator lights are provided on the encoder sensor housing, the display circuit board, and H-bridge module inside the Simple Set control box. Observe the LED lights during operation to identify problems with the sensor, drum switches, or Simple Set control.

NORMAL OPERATION:

- As the up/down gearbox shaft spins to move the saw head up or down, the sensor LED will illuminate and brighten. After each complete revolution of the shaft, the LED will turn off, then illuminate and brighten.

MANUAL MODE

- In manual mode, the control board LED and the H-bridge D2, D3, D4 LEDs will illuminate (red) when the drum switch is activated in the down direction and (green) when the up/down drum switch is activated in the up direction. The LEDs will turn off when the drum switch is released. The H-bridge D8 LED will illuminate blue to indicate the 5 Volt DC output to the control board.

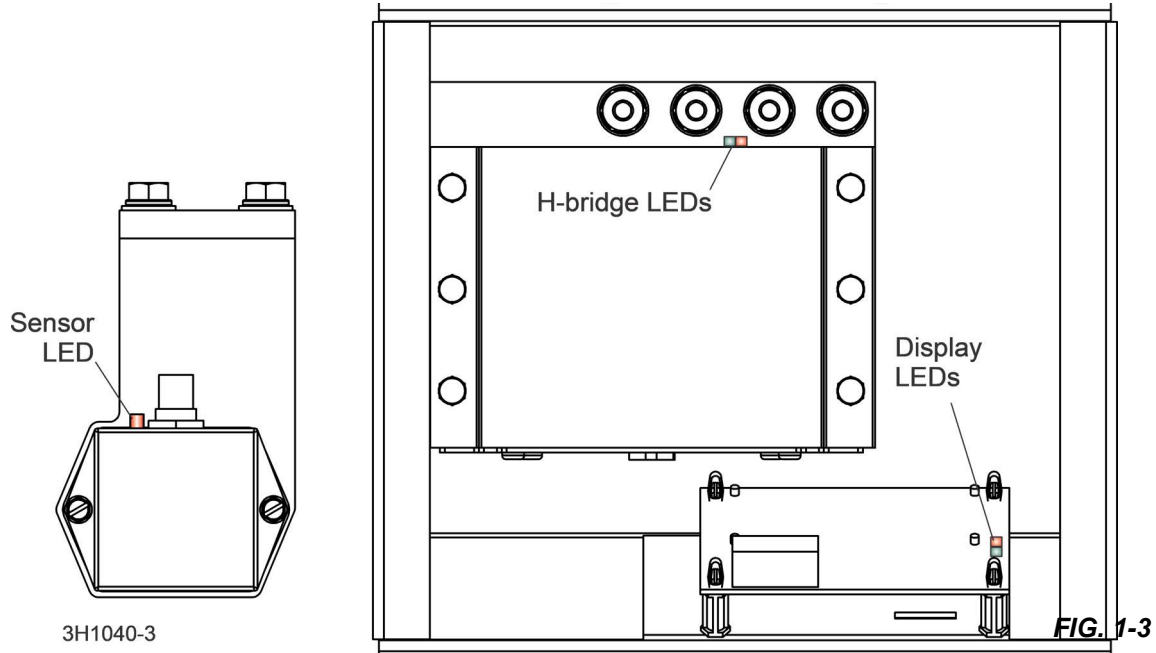

AUTO MODE

- In auto mode, the control box LED and the H-bridge D2, D3, D4 LEDs will illuminate (green) in the up direction as in manual mode. When the drum switch is bumped in the down direction, the control box LED and the H-bridge D2, D3, D4 LED's will illuminate (red) in the down direction but the control board LED will immediately turn off. When the blade reaches the increment value set by the Simple Set control, the D2, D3, D4 LEDs on the H-bridge will turn off.

If the drum switch is held down or the saw head coasts past the increment, the H-bridge D2, D3, D4 LEDs will illuminate (green) indicating the blade will move up to return to the increment value. When the blade reaches the increment value, the H-bridge D2, D3, D4 LEDs will turn off.

Diagnostic Lights (Prior to Mid-2016)

LED indicator lights are provided on the encoder sensor housing, the display circuit board, and H-bridge module inside the Simple Set control box. Observing the LED lights during operation can help identify problems with the sensor, drum switches or Simple Set control.

During normal operation:

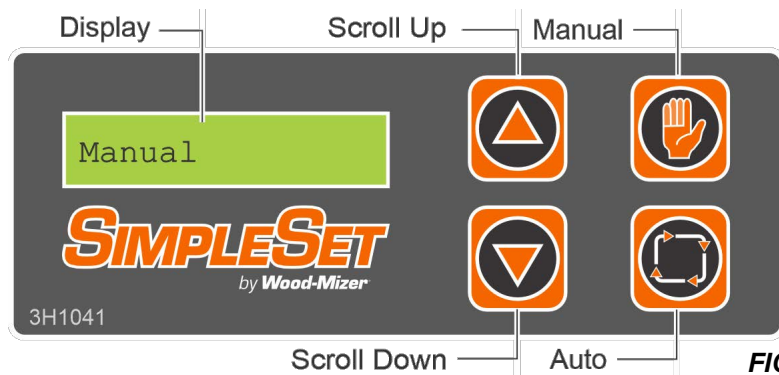

- As the up/down gearbox shaft spins to move the saw head up or down, the sensor LED will illuminate and brighten. After each complete revolution of the shaft, the LED will turn off then illuminate and brighten.
- In manual mode, both control box LEDs will illuminate red when the drum switch is activated in the down direction and green when the up/down drum switch is activated in the up direction. Both LEDs will turn off when the drum switch is released.
- In auto mode, both control box LEDs operate the same (green) in the up direction as in manual mode. When the drum switch is bumped in the down direction, both LEDs will illuminate red and then the display LED will immediately turn off. When the blade reaches the increment value set by the Simple Set control, the LED on the H-bridge will turn off. If the drum switch is held down or the saw head coasts past the increment, the H-bridge LED will illuminate green indicating the blade will move up to return to the increment value. When the blade reaches the increment value, the H-bridge LED will turn off.

Simple Set Up/Down Gear Settings Adjustment

1. Make sure the power to the control box is on.
2. Press and hold the Manual button and then press and hold the UP button
3. Release the Manual button, then release the UP button

The Simple Set control panel will display the Speed setting.

4. Press the Auto button several times until "Gear: 0.xxxx" appears.
5. Use the Up/Down buttons to set the value of the Gear Setting as shown in the table below.

Models	Revision	Gear Setting	InvGear Setting
--------	----------	--------------	-----------------

LT40 (Default)	All	0.0938 (Default)	No (Default)
LT35/LT35HD	Any revision (upgraded with Up/Down Kit 074029)	0.1170	Yes
LT35/LT35HD	A1.00 - A1.02	0.2250	Yes
LT35/LT35HD	A2.00 - A2.01	0.3492	Yes
LT35/LT35HD	A3.00 - A4.01	0.1170	Yes
LT35/LT35HD	A5.00+ (or any revision upgraded with Up/Down Kit 074316)	0.1170	No
LX150/250	A1.00+	0.1350	Yes

6. Press the Auto button to display "InvGear: xx".
7. Use the Up/Down buttons to set the InvGear setting to the required value as shown in the table above.
8. Press the Manual button to return to the main menu.

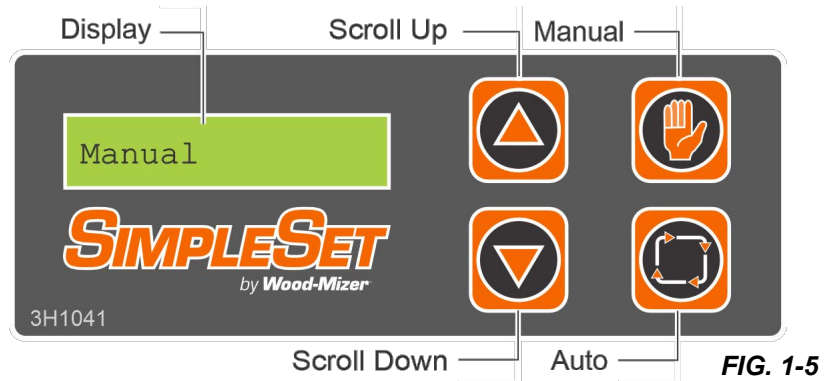

Simple Set PID Settings

1. Make sure the power to the control box is on.
2. Press and hold the Manual button and then press and hold the UP button.
3. Release the Manual button, then release the UP button.

The Simple Set control panel will display the Speed setting.

4. Press the Auto button several times until PGain, DGain and IGain settings appear.
5. Use the Up/Down buttons to set the settings to the required values.

NOTICE The PID settings are factory-set and they should not be changed. If necessary, set the PID settings to the following values: PGain 1.0, DGain 0.0 and IGain 0.0.

6. Press the Manual button to return to the main menu.

SECTION 2 REPLACEMENT PARTS

2.1 Simple Set Kit, Complete (Standard)

3H1040D

REF	PART #	DESCRIPTION	COMMENTS	QTY.
	SSW	KIT, FACTORY-INSTALLED SIMPLE SET (STANDARD)		1
	SSW-R	KIT, FIELD-INSTALLED SIMPLE SET (STANDARD)		1
1		Simple Set Control	(See Section 2.5)	
2	F05015-1	Screw, 1/4-20 x 1/2" Slotted Hex Head		2
3	R02348	Tubing, 1/2" Neoprene		.5 ft.
4	F05004-218	Screw, #10-24 x 3/8" Button Socket Head Stainless		2
5	F05010-14	Nut, #10-24 Self-Locking Hex		2
