PC100 Revision History

Model Revision				Revision Description	TB #	ECN #	Date
PC100							
A1.00				Prototype			
A1.02				Redesigned dust chute bracket.		38960	4/21/2023
A1.02				Released to production.		39115	10/11/2023
A2.00				Move the access panel limit switches away from the panel fasteners, and replace the 1/4-20 Weld Nuts (F05010-40) with 1/4-20x1/2 Bosses (021258). Replace 116567 with 121136 in the left and right hand cabinet assemblies. So the limit switches are tripped by the access panels and not the fasteners. The weld nuts are stripping after multiple uses. 121136 is what is currently used in production.		39759	6/1/2025
