SECTION 1 GENERAL INFORMATION

1.1 How To Use The Parts List

- Use the table of contents or index to locate the assembly that contains the part you need.
- Go to the appropriate section and locate the part in the illustration.
- Use the number pointing to the part to locate the correct part number and description in the table.
- Parts shown indented under another part are included with that part.
- Parts marked with a diamond (◆) are only available in the assembly listed above the part.

See the sample table below. Sample Part #A01111 includes part F02222-2 and subassembly A03333. Subassembly A03333 includes part S04444-4 and subassembly K05555. The diamond (◆) indicates that S04444-4 is not available except in subassembly A03333. Subassembly K05555 includes parts M06666 and F07777-77. The diamond (◆) indicates M06666 is not available except in subassembly K05555.

¹ Roller/Block Assembly 003926 is no longer available. Use component parts to service or order Roller/Block Assembly 036818 for 1-1/4" blades or 065934 for 1-1/2 blades.

² Shaft Weldment 003924 modified to provide more clearance for adjustment bolts and to prevent water leaks (Rev. B3.01). New shaft requires two 1/16" NPT Pipe Plugs 007734.

³ The sawmill is equipped standard with non-greasable blade guide rollers that can be used with the standard 1 1/2" blade. The roller can also be used with 1 1/4" blades. Optional extended blade guide rollers are available for use with 1 1/2" blades. The extended rollers may provide more stability during difficult sawing, but will reduce the total amount of times the blade can be reused after sharpening. Optional relube versions of each roller configuration are also available.

⁴ Nord-Lock Washer F05011-125 replaced Split Lock Washer F05011-9 to prevent loosening due to vibration (Rev. B3.01).

⁵ Straight Tube Fitting P03078 replaced Swivel Hose Fitting P09736 and Clamps 024155 added to improve lube hose routing (Rev. B3.01).

⁶ 052309 blocks for use with 1 1/2" blade provided as standard equipment. 052355 blocks available for optional use with 1 1/4" blades. EZ-Glide blocks 036347 are available for customers who prefer this block

⁷ Bearing must be modified for use with relube roller assemblies. Remove one seal from each bearing, place open sides facing each other and place spacer 035411 between bearings.

² The sawmill is equipped standard with non-greasable blade guide rollers that can be used with the standard 1 1/2" blade. The roller can also be used with 1 1/4" blades (requires spacer 052364). Optional extended blade guide rollers are available for use with 1 1/2" blades. The extended rollers may provide more stability during difficult sawing, but will reduce the total amount of times the blade can be reused after sharpening. Optional relube versions of each roller configuration are also available.

³ Nord-Lock Washer F05011-125 available to replace Split Lock Washer F05011-9 to prevent loosening due to vibration (12/09).

⁴ Blade guide wear blocks 052309 & 052355 replace EZ-Glide block 036347 originally supplied to improve wear life. 052309 blocks for use with 1 1/2" blade provided as standard equipment. 052355 blocks available for optional use with 1 1/4" blades. EZ-Glide blocks 036347 are available for customers who prefer this block. EZ-Glide pad assembly 036347 replaced Wear Pad assembly 042860 supplied prior to Rev. A3.00. New pad is cost effective and contributes to longer blade life.

⁵ 1/8" thick spacer 052364 replaces 1/4" spacer 041626 to provide proper spacing of blade guide block when using 1 1/4" blades.

⁶ Bearing must be modified for use with relube roller assemblies. Remove one seal from each bearing, place open sides facing each other and place spacer 035411 between bearings.

¹ 017807 Blade Guide Assembly replaced with 036818 12/05 then 003926 1/08 and no longer available. Use component parts to service or replace entire assembly with 003926. New assembly provides easier adjustment ([See Section 2.1](#)). Blade Guide Assembly 017807 upgraded with new Block Weldment and Shaft to accommodate 7/16" adjustment hardware to improve durability (12/06). Use kit 038972 to retrofit previous revisions.

² The sawmill is equipped standard with non-greasable blade guide rollers that can be used with the standard 1 1/2" blade. The roller can also be used with 1 1/4" blades (requires spacer 052364). Optional extended blade guide rollers are available for use with 1 1/2" blades. The extended rollers may provide more stability during difficult sawing, but will reduce the total amount of times the blade can be reused after sharpening. Optional relube versions of each roller configuration are also available.

³ Wear Block 052367 available 10/07 and provided as standard 4/09. Use to replace ceramic guide block 035222, screw F05004-71 & mount block 035235 originally supplied. EZ-Glide Block 036247 available for customers who prefer this block. Wear Block 052366 available for optional use with 1 1/2" blades.

⁴ Mount Shaft 044047, Adjuster Block 035408, 3/8" Set Screws F05007-162 & 3/8" Jam Nuts F05010-22 replaced with 7/16" adjustment hardware. Mount Shaft 044047 & Adjuster Block 035408 no longer available. Use kit 038972 to retrofit original parts.

⁵ Lower jam nut F05010-38 replaced with hex nut F05010-202 (3/07).

⁶ Stainless Set Screw replaces Zinc plated screw F05007-213 used prior to 6/07 to eliminate screw shearing.

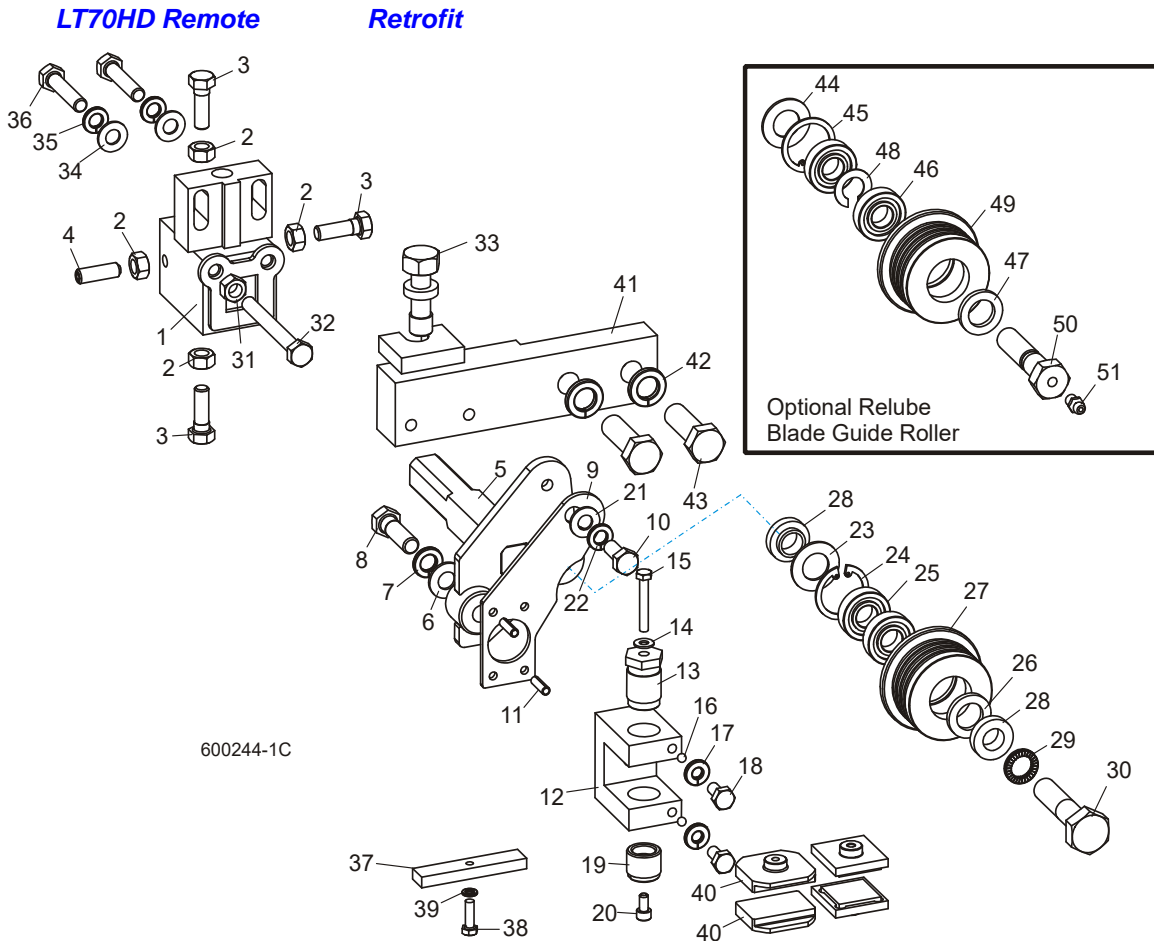

⁷ Replaces four F05007-96 originally supplied prior to Rev. A1.02.

⁸ Bearing must be modified for use with relube roller assemblies. Remove one seal from each bearing, place open sides facing each other and place spacer 035411 between bearings.

² The sawmill is equipped standard with non-greasable blade guide rollers that can be used with the standard 1 1/2" blade. The roller can also be used with 1 1/4" blades (requires spacer 052364). Optional extended blade guide rollers are available for use with 1 1/2" blades. The extended rollers may provide more stability during difficult sawing, but will reduce the total amount of times the blade can be reused after sharpening. Optional relube versions of each roller configuration are also available.

³ Nord-Lock Washer F05011-125 available to replace Split Lock Washer F05011-9 to prevent loosening due to vibration (12/09).

⁴ Blade guide wear blocks 052309 & 052355 replace EZ-Glide block 036347 originally supplied to improve wear life. 052309 blocks for use with 1 1/2" blade provided as standard equipment. 052355 blocks available for optional use with 1 1/4" blades. EZ-Glide blocks 036347 are available for customers who prefer this block. EZ-Glide pad assembly 036347 replaced Wear Pad assembly 042860 supplied prior to Rev. A3.00. New pad is cost effective and contributes to longer blade life.

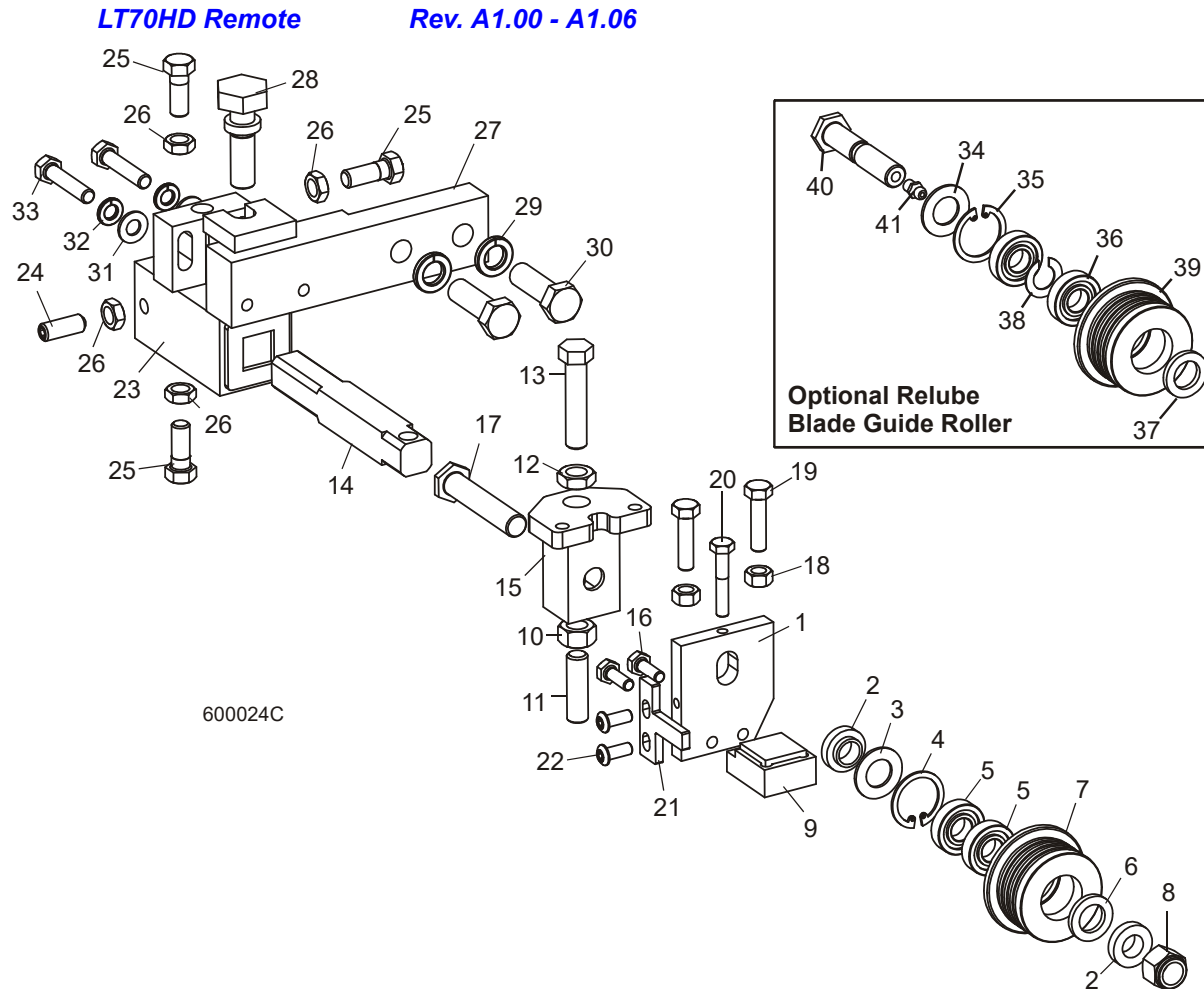

⁵ 1/8" thick spacer 052364 replaces 1/4" spacer 041626 to provide proper spacing of blade guide block when using 1 1/4" blades.

⁶ Bearing must be modified for use with relube roller assemblies. Remove one seal from each bearing, place open sides facing each other and place spacer 035411 between bearings.

¹ 044046 Blade Guide Assembly replaced with 036812 12/05 then 003925 1/08 and no longer available. Use component parts to service or replace entire assembly with 003925. New assembly provides easier adjustment ([See Section 2.4](#)). Blade Guide Assembly 044046 upgraded with new Block Weldment and Shaft to accommodate 7/16" adjustment hardware to improve durability (12/06). Use kit 038972 to retrofit previous revisions.

² The sawmill is equipped standard with non-greasable blade guide rollers that can be used with the standard 1 1/2" blade. The roller can also be used with 1 1/4" blades (requires spacer 052364). Optional extended blade guide rollers are available for use with 1 1/2" blades. The extended rollers may provide more stability during difficult sawing, but will reduce the total amount of times the blade can be reused after sharpening. Optional relube versions of each roller configuration are also available.

³ Wear Block 052367 available 10/07 and provided as standard 4/09. Use to replace ceramic guide block 035222, screw F05004-71 & mount block 035235 originally supplied. EZ-Glide Block 036247 available for customers who prefer this block. Wear Block 052366 available for optional use with 1 1/2" blades.

⁴ Mount Shaft 044047, Adjuster Block 035408, 3/8" Set Screws F05007-162 & 3/8" Jam Nuts F05010-22 replaced with 7/16" adjustment hardware. Mount Shaft 044047 & Adjuster Block 035408 no longer available. Use kit 038972 to retrofit original parts.

⁵ Lower jam nut F05010-38 replaced with hex nut F05010-202 (3/07).

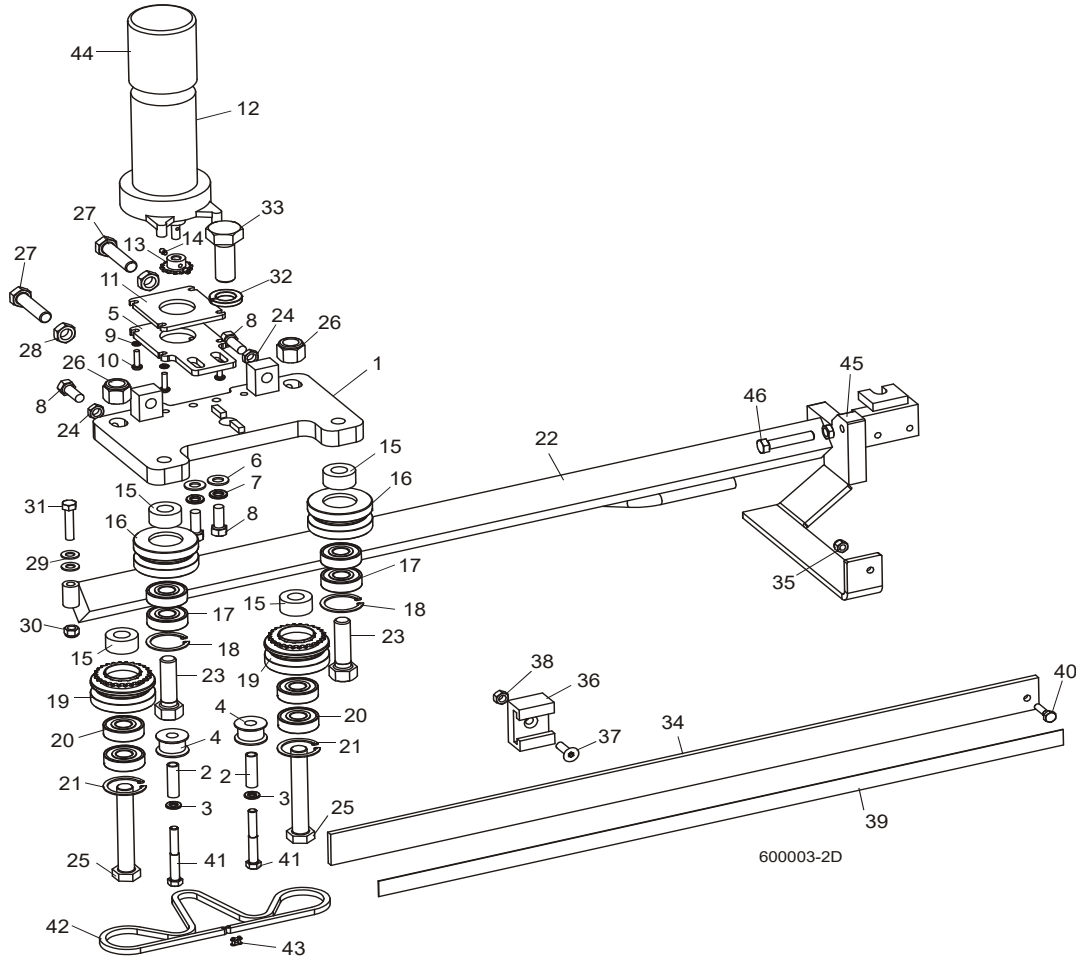

⁶ Stainless Set Screw replaces Zinc plated screw F05007-213 used prior to 6/07 to eliminate screw shearing.

⁷ Replaces four F05007-96 originally supplied prior to Rev. A1.02.

⁸ Replaces two F05006-119 originally supplied prior to Rev. A1.02.

⁹ Bearing must be modified for use with relube roller assemblies. Remove one seal from each bearing, place open sides facing each other and place spacer 035411 between bearings.
